Join us to flip the lid on waste

Our heart-rooted, art-and-craft-based workshops are for everyone — designed to nurture a deeper connection to holiness, self, and community.

Claire Turner, craft recycler

Artcycle. So what?

Stewardship, entrepreneurship and reducing consumption through joyful creation and play.

Based in Portchester, we are a collective of four crafty recyclers with diverse creative and life skills, with DBS and First Aid. Funded by donations and workshops, we transform everyday materials into art.

'We had an amazing time with you — thank you!'

8th Portsmouth Girls Brigade

School or club visits

Age appropriate workshops are held at AFC Portchester, but we can easily travel to local schools. In the summer season, we host our workshops outside in a lightweight Star Tent. All materials are prepared and separated into sacks to help children understand the process and value.

Our sessions include:

- Crisp-packet art installation
- educational collateral
- team game
- Artcycle achievement certificate.

Join us for a litter-pick

Stewardship begins with taking care of where we live; it could start with something as simple as making our bed in the morning. Litter is often viewed as someone else's problem, but once a month, we nurture our hearts and gather for an enjoyable hour of fresh air, equipped with tools ready to clean up the hedges and woodlands in Portchester.

Separation education

Learn the potential of a circular economy by creating a properly managed material bank of valuable resources for arts and crafts. While contamination has always been a challenge in recycling, through an engaging education, we aim to change mindsets.

Our mission

Encourage families to adopt a new mindset on waste and demonstrate its hidden potential. To fuel ambition and help people flourish and develop their unique gifts.

Bright colours, symbols, and words make rescuing materials child's play!

Revamp your school's waste bins and rescue materials for a constant supply of craft goodies. Download free labels and poster artwork at artcyclecic.co.uk/education-resources

Renewing Hearts & Minds

“My 10 year old daughter had a wonderful time today. She carried on creating what she had learnt when she got home and talked about how we can repurpose mixed recycling, showing care for the environment. The staff are enthusiastic and kind and great with online communication.

Will 100% be back.”

Gemma Sills

“My daughter, who has ADHD, has really enjoyed these sessions so far. She often finds it difficult being around others, but she has truly thrived at Artcycle C.I.C.”

Simon Allison, Director NeuroPal Kids
